Semester-6

Practical-2

Customize the site title, tagline, and site icon.

Step 1: Log in to Your WordPress Dashboard

1. Open your browser and go to:
2. `http://localhost/mywebsite/wp-admin`
(Replace mywebsite with your actual folder name.)
3. Log in using the **username** and **password** you created during installation.

Step 2: Change Site Title & Tagline

1. In the Dashboard, go to **Appearance** → **Customize**.
2. Click on **Site Identity**.
3. Update the following fields:
 - **Site Title:** e.g., My Local Blog
 - **Tagline:** e.g., Just another local WordPress site
4. *(Optional)* Uncheck **“Display Site Title and Tagline”** if you want to hide them.
5. Click **Publish** (top of the panel).

Step 3: Add a Site Icon (Favicon)

1. Still in the **Site Identity** section, scroll down to **Site Icon**.
2. Click **Select Image**.
3. Upload a square image that fits these guidelines:
 - **Recommended size:** 512 × 512 pixels
 - **Formats:** .png, .jpg, or .ico
4. Click **Select** → **Crop (if needed)** → **Publish**.

Setting	Where to Change
Site Title	Customize → Site Identity
Tagline	Customize → Site Identity
Favicon	Customize → Site Identity
